SKILLS

SYSTEMS & CONTAINERS :
LINUX, DOCKER, KUBERNETES, RANCHER, HELM
AUTOMATION & IAC
BASH, PYTHON, TERRAFORM, GIT, YAML
CI/CD & GITOPS :
GITLAB CI/CD, GITHUB ACTIONS, JENKINS, FLEET, HARBOR
MONITORING & TROUBLESHOOTING :
PROMETHEUS, GRAFANA, ELK STACK
SECURITY & ACCESS :
KEYCLOAK, OIDC/OAUTH2, JWT, VAULT, TRIVY, SONARQUBE
APPLICATION SERVICES & DATA :
JAVA, SPRING BOOT, POSTGRESQL, REDIS

PROFESSIONAL SKILLS

ATTENTION TO DETAIL, PROBLEM-SOLVING, AUTONOMY, TEAMWORK

LANGUAGES

- English: Advanced
- French: Fluent
- Arabic: Native

INTERESTS

- Kubernetes & Open Source, AI research, video games, football

CERTIFICATIONS

- OCI DevOps Professional
- Training in progress
- IBM — Containers with Docker, Kubernetes & OpenShift
- IBM — Cloud Computing
- Duke — Machine Learning

EDUCATION

Engineering Degree in Computer Science and Networks Engineering
Moroccan School of Engineering Sciences (EMSI)
2020 - 2026

Relevant coursework: *Cloud Computing, Linux Systems Administration, Software Engineering*

PROFESSIONAL EXPERIENCE

Cloud & DevOps Intern — Final-Year Project
Atlas Cloud Services | February–July 2026

• Designed and deployed a multi-cluster Kubernetes GitOps platform with Rancher and Fleet.
• Automated deployments with GitLab CI/CD and Helm to standardize environments.
• Monitored systems with Prometheus/Grafana and tracked deployments via Fleet to support troubleshooting.
• Secured access with Keycloak (OIDC) and managed secrets with Vault.
• Integrated Harbor for image/chart versioning and SonarQube/Trivy into pipelines.

Technologies: Linux, Kubernetes, Rancher, Fleet, Helm, GitLab CI/CD, Harbor, Keycloak, Vault, PostgreSQL, Redis

Full-Stack & AI Intern
Smart Automation Technologies | July–September 2025

• Developed a synthetic data platform and automated data validation.
• Containerized services with Docker and integrated CI/CD pipelines.

Technologies: Python, FastAPI, PostgreSQL, Docker

Full-Stack & DevOps Developer Intern
OCP Group | July–September 2024

• Developed an inventory management application.
• Integrated CI/CD pipelines to automate delivery.

Technologies: Java, Spring Boot, Next.js, Docker, Jenkins

ACADEMIC PROJECTS

AWS Infrastructure with Terraform
• Automated AWS infrastructure provisioning to host a containerized application.
• Monitoring with Prometheus and Grafana.
Technologies: Terraform, AWS (EKS, EC2, VPC, IAM), Kubernetes, Docker, Helm

FoodAllergyAI
• Containerized a Spring Boot API and automated testing and delivery with GitHub Actions.
Technologies: Java, Spring Boot, Docker, GitHub Actions, PostgreSQL
